EDUCATION

Master of Science, Data Science & Analytics Engineering — University of Maryland Eastern Shore | In Progress
Bachelor of Science, Software Engineering — Bahria University

SKILLS

Python

pandas, matplotlib, Jupyter Notebook, Selenium automation

Visualization & Reporting

Tableau, Excel dashboards, Pivot Tables, charts, business reporting

Systems & Tools

RStudio, Agile/SDLC, POS systems, Windows, macOS, networking basics

R Programming

dplyr, ggplot2, MASS, marginaleffects, panelvar, plm

Analytics & Modeling

Regression, econometrics, panel data, ordered logit/probit, forecasting, DCF valuation

PROJECTS

Economic Shock and Shadow Economy Analysis — R / Panel VAR

- Analyzed economic shocks, GDP growth, and shadow economy indicators using country-year panel data, standardized variables, visualization, and Panel VAR modeling.

Financial Forecasting and DCF Valuation Analysis — Python / Excel

- Built a forecasting and discounted cash flow valuation workflow including revenue forecasting, free cash flow estimation, terminal value, and sensitivity analysis.

Greenhouse Gas Emissions Tableau Dashboard — Tableau

- Created an interactive dashboard using UNdata greenhouse gas emissions data with line charts, heatmaps, emissions rankings, and country/year filters.

Ordered Health Models: Logit and Probit Analysis — R / Econometrics

- Compared ordered logit and ordered probit models for self-reported health status, including predicted probabilities, marginal effects, and robustness checks.

Maternal Smoking and Birth Weight Regression Analysis — R / Statistics

- Studied the relationship between maternal smoking and infant birth weight using exploratory analysis, multiple regression, controls, and model interpretation.

WORK EXPERIENCE

IT Analyst -> Business & Data Analyst — RW Gas and Food Corporation | Feb 2025 - Present

- Led transition from manual ticket-based operations to a fully digital POS system, improving transaction tracking and operational efficiency.
- Implemented and configured a centralized POS system integrating in-store sales with DoorDash, Uber Eats, and Grubhub platforms.
- Analyzed weekly sales data, revenue trends, and product performance to support pricing, inventory, and marketing decisions.
- Built structured Excel and Tableau reports for performance monitoring and presented insights during weekly strategy meetings.
- Maintained the company website and standardized pricing, menu updates, and promotions across digital ordering platforms.

Software Test Engineer — Codmen (SMC-Private) Limited | Feb 2023 - Jan 2025

- Designed, executed, and maintained manual and automated test cases across multiple applications.
- Automated regression testing using Selenium with Python, increasing test coverage and supporting stable releases.
- Developed test plans, identified defects, conducted performance testing, and collaborated with developers in Agile environments.

IT / Networking Intern — Catkin Engineering Sales and Services | 2020

- Assisted with LAN/WAN configuration, router and switch troubleshooting, basic network security checks, and end-user technical support.

CERTIFICATIONS

- ISTQB Foundation Level Tester
- Registered Software Engineer — Pakistan Engineering Council
